

Final Project Worksheet

Instructions: Use this Worksheet to document your findings. You can use Copilot, ChatGPT, or Gemini for this project.

Task 1: Develop prompts in your preferred generative AI tool to access ideas and complete the product concept entries as required.

The product concept should include the following:

- What markets should we target?
- What is the competitive landscape?
- What costs must we consider?
- How can we commercialize this product?
- Draft a value proposition

Your Prompt

Act as a product strategist for Elevate Eats, an AI-driven personalized nutrition and recipe platform. Provide:

1. the target markets most likely to adopt this product,
2. an overview of the competitive landscape,
3. core costs we must consider (technology, data partnerships, operations, marketing),
4. recommended commercialization strategies, and
5. a concise value proposition.

Ensure the analysis reflects AI, nutrition, and health-tech trends

Product Concept	
Target markets	• Health-conscious consumers • Individuals with dietary restrictions (gluten-free, vegan, diabetic, low-FODMAP) • Fitness and performance-focused users • Busy professionals seeking quick healthy meal planning • Parents wanting nutritious options for families • Healthcare providers offering patient nutrition guidance

Final Project Worksheet

Competitive landscape	• Competitors include MyFitnessPal, Noom, Yummly, HelloFresh app, Lifesum, and AI-based nutrition apps. • Strengths: personalization, AI-powered meal recommendations, real-time adaptation to health metrics. • Gaps: limited integration with wearables, minimal real nutrition intelligence, lack of culturally diverse recipes. • Elevate Eats opportunity: unify personalization, health data, and recipe generation in one platform
Costs to consider	• AI model development and tuning • Nutrition database licensing • App development (iOS, Android, Web) • Integrations with wearables and health APIs • Data privacy, compliance (HIPAA/health data depending on region) • Cloud hosting and compute • Marketing and user acquisition • Customer support • Ongoing nutrition research and content creation
Commercialization strategies	• Freemium app with paid premium tiers • Partnerships with fitness apps, smart kitchen devices, and healthcare providers • Sponsored ingredients or grocery integrations • Corporate wellness program offerings • Recipe marketplace or subscription upgrades • Cross-promotion with nutrition influencers and registered dietitians
Value proposition	Elevate Eats delivers personalized, AI-powered recipe recommendations aligned with users' dietary needs, health goals, and wearable data—making healthy eating effortless, enjoyable, and uniquely tailored to each individual.

Final Project Worksheet

Task 2: Develop a list of prioritized product features. Create prompts in your preferred generative AI tool to access ideas and complete the product requirements entries as required.

Your Prompt
Provide a prioritized list of product features for Elevate Eats using a MoSCoW framework (Must-Have, Should-Have, Could-Have). Include both essential and innovative AI-enhanced features.

Product Requirements
• Personalized recipe generation based on dietary preferences (Must Have)
• Integration with wearable devices to adapt recommendations to health metrics (Must Have)
• Shopping list creation and ingredient substitution suggestions (Should Have)
• Recipe image generation (AI visualization) for user previews (Could Have)
• Meal-prep scheduling with reminders and progress tracking (Should Have)
• Community sharing for recipes and health progress (Could Have)

Final Project Worksheet

Task 3: Develop a product roadmap to launch the product in versions over a one-year or four-quarter timeframe. Create prompts in your preferred generative AI tool to develop the product roadmap as required.

Your Prompt

Create a one-year product roadmap for Elevate Eats split into four quarterly releases. Include core feature development, integrations, user experience improvements, and premium tier rollout

Product Roadmap			
Quarter	Goals	Features	Milestones
Quarter 1	1.Establish product foundations and core AI functionality. 2. Build MVP with essential personalization features	1.AI-powered personalized recipe generation. 2.User onboarding & dietary preference setup. 3.Basic nutrition database integration	• MVP prototype completed • Initial AI model deployed • Internal testing + feedback cycle completed
Quarter 2	1.Expand integrations and increase user value 2.Launch essential wellness features	1.Wearable device integration (Fitbit, Apple Health, Garmin) 2.Real-time health metric adaptation 3.Shopping list creation 4.Ingredient substitution engine	• Beta release to early adopters • Wearable API connections validated • Public version 1.0 launch
Quarter 3	1.Improve user engagement and retention 2.Add planning and scheduling tools	1.Meal-prep scheduling with notifications 2.Progress tracking dashboard 3.Recipe image	• Release version 1.5 • Meal-prep adoption metrics established • Visual AI model enhancement rollout

Final Project Worksheet

		generation (AI visualization) 4.Save & favorite recipes functionality	
Quarter 4	1.Expand community features 2.Prepare for premium tier and monetization	1.Community sharing for recipes and health progress 2.Premium subscription tier 3.Advanced recommendations (macro goals, fitness syncing) 4.Corporate wellness integration options	• Release version 2.0 • Premium tier launched • Partnership pilot with a wellness or fitness brand

Final Project Worksheet

Task 4A: Develop prompts in DALL-E 3 to generate the marketing collateral images as follows:

- Show one or two happy and healthy customers using the product

Prompt: Create a bright, uplifting scene showing one or two happy and healthy customers using the Elevate Eats app on a smartphone or tablet. The customers are smiling while reviewing personalized recipe recommendations in a clean, modern kitchen. Include fresh fruits, vegetables, and cooking ingredients on the counter to visually reinforce health and nutrition. Use a warm, natural color palette and soft lighting to convey a positive, healthy lifestyle.

DALL-E Output

Final Project Worksheet

Task 4B: Develop prompts in DALL-E 3 to generate the marketing collateral images as follows:

- Provide a packaging recommendation for the product

Prompt: Generate a modern and clean packaging concept for Elevate Eats, an AI-powered personalized nutrition and recipe recommendation platform. Create a sleek, eco-friendly box design featuring vibrant produce imagery, minimalistic icons representing AI personalization, wellness, and balanced eating. Include the Elevate Eats logo, app preview graphics, and a tagline such as 'Healthy eating made effortless.' Use fresh greens, whites, and soft gradient accents to convey health, technology, and trust.
