

200603 M5 | L1 Lab Demand Generation Plan Template

Exercise 3: Develop a demand generation plan for the scenario.

Part I: Complete the demand generation plan based on the product concept and additional information provided.

Demand generation plan template	
Planning component	Recommended entries
Marketing objectives	• Define product marketing campaign objectives • Define the demand generation budget and resources required
Current market trends	• Define the market trends for this product
Primary marketing theme	• Define demand generation themes based on marketing research and trends • Share how you will capture the customer's attention
Target audience	• Define the market segments you will target • Define segments by demographics or regions
Specific programs or tactics	• Summarize all promotion vehicles or advertising tactics you will use to generate demand
Campaign schedule	• Summarize demand generation programs and the timeline to implement them
Industry associations and expert engagement	• Identify organizations and key influencers the campaign will try to engage
Key tracking metrics	• Share how the campaign's effectiveness will be tracked and measured
Demand generation lead	• Identify who is assigned to implement the demand generation plan

Part II: Demand generation plan template

Demand generation plan template	
Planning component	Recommended entries
Marketing objectives	• Increase brand awareness for the WB-3000 in the education and business collaboration markets. • Generate Marketing Qualified Leads (MQLs) and Sales Qualified Leads (SQLs) through events, influencer seeding, and digital campaigns. • Support Year 1 sales goal of 3,000 units and Year 2 goal of 5,000 units. • Drive trial through beta testimonials, event demos, and early adopter buzz. • Budget requirements: • Marketing & events: \$50,000 • Additional digital advertising: \$15,000–\$20,000 • Beta usability budget: \$25,000
Current market trends	• Rapid growth in hybrid work and virtual collaboration tools. • Growth in portable and mobile whiteboard technologies (market projected to reach \$8.7B by 2030). • Increased adoption of real-time annotation and screen-sharing tools. • Strong demand from educators and mobile professionals, especially with back-to-school and fiscal-year resets. • Competitors offer more expensive, less feature-rich products — strong opportunity for price leadership.
Primary marketing theme	• Main theme: “Take your conference room anywhere.” • Emphasize portability, real-time collaboration, and seamless laptop integration. • Highlight lower price with superior features compared to competitors. • Showcase how the WB-3000 enables users to brainstorm, present, and collaborate anywhere. • Themes built around convenience, mobility, productivity, and multi-device compatibility.
Target audience	• Primary Segments: • Teachers, professors, and academic institutions

	• Business professionals, sales teams, and consultants • Government agencies and training units • Remote workers and frequent travellers • Demographics/Regions: • U.S. educational institutions (K-12, higher education) • Corporate markets in technology, consulting, and government • Early adopters in business innovation and training
Specific programs or tactics	• Social media campaign (LinkedIn, Facebook, Instagram) with paid ads. • Early adopter program: providing free units to select influencers and organizations in exchange for feedback and testimonials. • Email marketing to LWT newsletter list and educational contacts. • Promotional videos for website and online distributors (Amazon, Walmart). • Trade show booths at 2 major education events (July) and 3 communication tech events (August). • Free demo unit giveaways for institutional buyers to trial. • Discount campaigns for educators and volume buyers.
Campaign schedule	• February–May: ○ Prepare collateral, videos, landing pages, sales demos. ○ Begin promotional teasers on social media. • June: ○ Launch demand generation activities. ○ Start influencer seeding and early adopter program. ○ Begin digital paid advertising. • July–September: ○ Major event participation (5 events total). ○ Collect testimonials and video case studies. ○ Push heavy advertising in back-to-school window. • Post-launch (Months 4–12): ○ Continued drip campaign to education, government, and corporate sectors. ○ Publish analyst reviews and technical whitepaper. ○ Maintain weekly social and monthly email campaigns.
Industry associations and expert engagement	• Engage education technology groups and associations (ISTE, EdWeek). • Engage business innovation organizations and collaboration tech reviewers.

	• Partner with professional influencers in education and business productivity. • Submit products to industry analysts for evaluation and inclusion in reports. • Attend government and military technology symposium for credibility and exposure.
Key tracking metrics	• Marketing Qualified Leads (MQLs) • Sales Qualified Leads (SQLs) • Cost per Acquisition (CPA) • Event lead volume and conversion rate • Email campaign open and click rates • Website landing page conversion rate • Digital ad impressions and ROI • Actual units sold per channel • Social engagement metrics (shares, comments, video views)
Demand generation lead	• Marketing Director is responsible for execution. • Works with: • Sales leadership • UX team (for beta insights) • Product manager • Social media & PR team • Legal (for influencer agreements and early adopter contracts) • Responsible for final reporting of MQL → SQL → Sales conversions.
