

Product Concept Worksheet

Instructions: Use this worksheet to record your inputs from Gemini.

Product Concept Document Entries

- Market problem or opportunity
- Market segments
- Financial considerations
- Competitive landscape
- Main features and functionality
- Key differentiators

Product Concept Worksheet

Part I: Gemini Product Concept Analysis

Prompt:
Gemini Output
1. Market Problem or Opportunity Pet owners increasingly want eco-friendly, durable, and non-toxic dog toys. Many current products break easily, create waste, or use unsafe plastics. There is a market opportunity for toys that combine sustainability, safety, enrichment, and longevity.
2. Market Segments • Eco-conscious pet owners seeking sustainable products • Active dog owners needing durable chew-resistant toys • Dog parents who prioritize enrichment, mental stimulation, and emotional well-being • Premium buyers willing to pay more for ethically made products • Retailers specializing in natural, organic, or sustainable pet supplies
3. Financial Considerations • Premium sustainable toys typically generate higher margins. • Production costs slightly higher due to recycled rubber, organic cotton, bamboo fibre. • Lower defect and replacement rates due to durability = reduced warranty costs. • Ability to launch subscription bundles (monthly enrichment kits). • Estimated MSRP range: \$12 – \$29 depending on size/material.
4. Competitive Landscape Major competitors: • KONG – durability leader, limited eco-friendly focus • West Paw – strong eco-friendly branding, high-quality recycled materials • PetSafe – enrichment toys, but less sustainability emphasis • Amazon Basics Pet – low-cost options, not eco-focused Opportunity: combine KONG-level durability with West Paw-level sustainability and superior design.
5. Main Features & Functionality • Non-toxic, biodegradable, or recycled materials

Product Concept Worksheet

- Chew-resistant textures and reinforced seams
- Interactive features (treat puzzle, squeakers, tug loops)
- Multiple sizes for different breeds
- Dishwasher-safe / easy-to-clean
- Natural colours derived from vegetable-based dyes
- Optional scent-infused toys (lavender for calming)

6. Key Differentiators

- **100% eco-friendly:** recycled rubber, organic cotton, bamboo fiber
- **Circular economy program:** customers return old toys for recycling
- **High durability rating** validated by real dog testers
- **Modular toy system** (pieces attach/change function)
- **Strong sustainability branding** appealing to modern pet owners
